

Corrigendum

The tender document has been very generic in nature. However, for any apparent observations regarding specific product and make may be ignored and the prospective bidder may submit their bids with products, which meet the specification of the products and project requirement as mentioned.

2. While designing the solution with a particular product, the vendor has to consider the WebTrust requirement and these have to be fulfilled in time targeted manner as specified in the tender.

3. Considering Observations, the committee recommends that deadline for submission of the bids against the tender may be extended by seven days (i.e. **11th November, 2022, 3.00 pm**).
