National Internet Exchange of India (NIXI) was set up for peering of ISPs among themselves for routing the domestic traffic within the country, instead of taking it all the way to US/Abroad, thereby resulting in better quality of service (reduced latency) and reduced bandwidth charges for ISPs by saving on International Bandwidth. NIXI is managed and operated on a Neutral basis, in line with the best practices for such initiatives globally.

SCOPE OF WORK

About Tender:

NIXI has envisioned to have an interconnected network of Internet Exchange Points to become one of the leading IXP provider in the country. To enable NIXI to offer quality and relevant data to its ISP members, need for increasing the number of CDN partners was identified.

NIXI had contacted PCH for peering and PCH showed keen interest to peer with NIXI. Under the proposal, it is proposed that NIXI will provide the necessary support required by Packet Clearing House as requested by them.

Packet Clearing House (PCH) is an international not-for-profit organization charged with providing operational support and security to critical Internet infrastructure, including Internet exchange points and the core of the domain name system. They operate public looking-glasses and routing data-collection facilities at approximately a third of the world's public Internet Exchange Points (IXPs). To cater to the growing requirements in services, NIXI needs to provide a unique and necessary service to the Internet infrastructure community and their critically requires that we provision each with sufficient interconnection bandwidth to protect them against distributed denial of services (DDoS) attacks.

Objective of Tender

NIXI has planned huge infrastructure investment in setting up of new Internet Exchanges on Pan India basis. In order to make available uninterrupted, reliable and quality work in respect of connectivity the NIXI wishes to engage the companies, which can deliver within the prescribed timeline.

Only those vendors shall submit the tender who are in a position to deliver the goods to meet the above requirement as per the schedule listed above.

Vendor Selection

The modalities to identify the vendors, the foremost criteria will be the best rates offered by them and nevertheless the lead time taken between initiating the order and providing the connectivity. The bidder has to focus on the capacity to provide the same keeping in view the resources he possesses. As such, the criteria of selection will be based on the points scored on the following weightage:

Financial Bid: 70%
Completion Time: 30%

It is expected that NIXI will project the demand on different scales, which will definitely attract price-discrimination by the bidders. It is, therefore, decided that the vendors shall give the net price after the due consideration. If the prices quoted by the vendors appear to be high, the NIXI can negotiate the prices to bring down the prices to the reasonable level.

The order will be placed to the vendor who has quoted the best price and taking least time for providing the connectivity. In case, the vendor fails to make available the right quality and right quantity at the right place in right time, then the NIXI has every

right to pass on the order to some other vendor with a penalty on the original vendor (including blacklisting). It is, therefore, expected from the vendors that before making the commitments, they have to ensure the timely and speedy connectivity.

NIXI invites commercial offers from two service providers for supplying Internet Bandwidth inclusive of Last Mile Access Network up to its NIXI STT Chennai, STT Delhi & GPX-2 Mumbai location over Ethernet for the purpose of transit to DNS server in India.
